Name_____   Date_____

Follow the directions and answer the questions.

1. With a hole punch, punch the o's that have been marked. There should be one for each of the 3 categories: temperature, wind speed,, and weather conditions. Next, stack all worksheets together facing the same way. Using the top worksheet as a guide, slide a pencil through the one of the marked holes in the Temperature category. Find similar answers that are marked on other sheets in the stack, sliding the pencil through each of those holes (they will all be the same exact temperature). Compare the city and state.

Temperature   Cities
_____   _____

2. Do the same with the remaining worksheets. Use the top worksheet as a guide and slide the pencil through marked holes on a different temperature marked.

Temperature   Cities
_____   _____

3. How many cities that were researched have the same temperature range?
#1 above - Total number of cities _____
#2 above - Total number of cities _____
4. What factors could contribute to some cities in the same state having different temperature ranges?

5. Do the same for wind speed and weather conditions.
Wind Speed   Cities
_____   _____

Wind Speed   Cities
_____   _____

Weather Conditions   Cities
_____   _____

Weather Conditions   Cities
_____   _____

6. What factors could contribute to some cities in the same state having different weather conditions?

7. What would be the benefit of recognizing similarities?

8. What would be the benefit of recognizing differences?
